Art No. WL0033

Wireless LAN 54MBit Signal Booster

Specifications

- Work with IEEE 802.11g and 802.11b wireless LAN devices
- Stronger output power improves the link quality and coverage distance of WLAN devices significantly
- 500/200/100 mW output power adjustable enables the booster to be used for various environments
- Provide extend cable with 75 cm length for AP re-location
- Standards: IEEE 802.11g/b
- Frequency Range: 2.4GHz ~ 2.5GHz
- Connector: Reverse SMA Jack x 2
- Output Power: 500/200/100mW
- Transmitter Input Power: 4dBm~ 13dBm (Max.)
- Receive Input Power: -16Bm (Max.)
- Receiver Gain: 12dB typical
- Temperature: 32-131°F (0-55°C)
- Humidity: 10~95% (Non-Condensing)
